MOTOROLA RAZR™

START

Get up and running.

1. Start your smartphone.

- Press the power and volume keys at the same time to open the power menu.
- Select Power off, then select Restart or Power on.
- If you want to make your smartphone sleep, press the power key once.

Note: Certain apps and features may not be available in all languages.

SET UP & GO

Create an account in a Google™ account. The first time you turn on your smartphone, you’ll be asked to sign in to your Google Account or create a new account.

HOME & APPS

Your two main smartphone screens—Home and Apps. The home screen is what you see when you turn on your smartphone.

WEBTOP

Browse, or use web apps, on a large screen in a full windowed environment.

SEARCH

Touch to search or view your bookmarks.

### Regulatory Information

#### For Your Safety

- If a battery pack is not properly inserted and locked in place, the device may not function properly.
- The device should not be exposed to water, rain, excessive moisture, or extreme temperatures.
- The device should be used only with approved accessories.
- The device should be operated only within the battery voltage range of 3.7 V DC.
- The device should not be disassembled or modified.

#### Specific Absorption Rate (FCC)

The device complies with the radio frequency (RF) exposure guidelines set by the Federal Communications Commission (FCC) of the U.S. Government. When using the device, the distance between the antenna and your body should be at least 2.5 cm (1 inch) to meet the RF exposure guidelines. The SAR limit for mobile devices is 1.6 W/kg.

#### Additional Information

- The device should be used only in the tested frequency bands.
- The device should be used in a manner that does not exceed its rated power output.
- The device should be used in a manner that does not exceed the specified power output.
- The device should be used in a manner that does not exceed the maximum power output.

#### Specific Absorption Rate (ICNIRP)

The device complies with the radio frequency (RF) exposure guidelines set by the International Commission on Non-Ionizing Radiation Protection (ICNIRP). When using the device, the distance between the antenna and your body should be at least 2.5 cm (1 inch) to meet the RF exposure guidelines. The SAR limit for mobile devices is 4 W/kg.

#### Additional Information

- The device should be used only in the tested frequency bands.
- The device should be used in a manner that does not exceed its rated power output.
- The device should be used in a manner that does not exceed the specified power output.
- The device should be used in a manner that does not exceed the maximum power output.

### Additional Information

- The device should be used only in the tested frequency bands.
- The device should be used in a manner that does not exceed its rated power output.
- The device should be used in a manner that does not exceed the specified power output.
- The device should be used in a manner that does not exceed the maximum power output.
